Education

AMTICS, Uka Tarsadia University | Bardoli, Gujarat, India — **Sep 2022 – May 2026**
Bachelor of Technology in Computer Science & Engineering — *Cumulative CGPA: 9.78/10.0*

Professional Experience

Capabl India – *Full Stack Developer Intern* | Bengaluru, Karnataka, India — **Sep 2025 – Present**

- Engineered 3 cross-platform EdTech products using React Native, Expo, and React/TypeScript, integrating PostgreSQL and AWS microservices to support learning workflows for 160+ active students.
- Hardened mobile security across iOS and Android by deploying 5 native protection controls (root/jailbreak detection, screen-capture blocking, and anti-tampering), mitigating primary content-piracy vectors.
- Built a 10-module administrative LMS integrating Amplitude Analytics and reusable UI components, centralizing course operations and capturing end-to-end user conversion funnels.

Popway Software Pvt Ltd – *Software Developer Intern* | Surat, Gujarat, India — **Jul 2024 – Apr 2025**

- Architected enterprise billing and inventory software using .NET and SQL, automating invoicing and stock reconciliations to boost client operational efficiency by 20%.
- Developed in-store catalog and sales-tracking interfaces in Flutter, eliminating 60% of manual register overhead and cutting reported UI latency by 30%.
- Integrated asynchronous REST APIs and real-time database synchronizations, stabilizing transaction throughput across multi-device commercial deployments.

Soomuch Smart Solutions – *Full Stack Developer Intern* | Hyderabad, Telangana, India — **Jan 2024 – May 2024**

- Spearheaded the end-to-end UX redesign and frontend build for the Soomuch AI mobile and web platforms.
- Designed 30+ interactive design-system components in Figma, accelerating engineering handoff cycles and cutting frontend UI integration discrepancies by 40%.
- Integrated Python backend services and optimized REST API endpoints, improving payload response times by around 25% across core conversational and search features.

Projects

Atheno – *AI Car Advisor & Resale Price Predictor* — GitHub

- Developed an end-to-end vehicle advisory system combining a constraint-based recommender with an XGBoost resale price predictor via SHAP attribution. Built preprocessing pipelines and deployed an interactive Streamlit UI for sub-second vehicle filtering.

Technologies: Python, XGBoost, scikit-learn, SHAP, Streamlit

Kavach – *Real-Time Crime Reporting & Citizen Safety Platform* — GitHub

- Architected a GovTech platform with live evidence capture, geofencing, and an AI safety assistant, reducing report dispatch time by 60% with sub-second mapping. Integrated Firebase real-time sync to reliably process multi-modal media and concurrent distress alerts.

Technologies: Flutter (Dart), Node.js, Firebase (Realtime DB & FCM), Google Maps API, Dialogflow, OpenRouter

Ciphera – *AI-Powered Secure Code Assistant* — GitHub

- Engineered a VS Code extension uniting AST analysis, Bandit, and LLMs to detect 20+ OWASP/CWE flaw types with 88% accuracy at <200 ms latency. Built non-blocking event debouncing for live in-IDE diagnostics and automated remediation reporting.

Technologies: TypeScript, Python, VS Code API, Python AST, Bandit, OpenRouter (LLM Inference)

QRNG – *Quantum Random Number Generator & Entropy Analysis Suite* — GitHub

- Implemented a Qiskit quantum entropy pipeline using single-qubit superpositions, verifying 10,000-bit streams via Shannon entropy ($H \approx 1.0$) and Chi-Square tests. Packaged reproducible CLI verification scripts with a Streamlit telemetry dashboard.

Technologies: Python, Qiskit, Qiskit Aer, SciPy (Statistical Benchmarking), Streamlit

Technical Skills

- **Languages:** Python, Java, SQL, TypeScript, JavaScript
- **Frameworks & ML:** FastAPI, Node.js (Express), React, Flutter, Streamlit, scikit-learn, XGBoost, SHAP, OpenCV
- **Databases & Tools:** MongoDB, Firebase, Supabase, REST APIs, Git, GitHub Actions, Amplitude Analytics, Postman

Achievements

- **Amazon ML Summer School 2025:** Selected for Amazon's ML program; trained in Deep Learning, Generative AI, LLMs, and Causal Inference.
- **Idea Hunt 2023 (SSIP):** Secured INR 30,000 in state funding for an Electro-Hydrodynamic (EHD) laptop cooling system.
